

The screenshot shows the Visual Studio Code editor interface. The Explorer panel on the left shows a project structure with folders like 'my-app', 'next', 'app', and 'Component'. The 'Card.css' file is selected in the 'app' folder. The main editor area displays the content of 'Card.css', which includes a '.main' rule with flexbox properties and a '.loknath' rule with text-align and font-size properties. A syntax error is highlighted in the '.loknath' rule, specifically in the 'color' property value 'rgb(26, 21, 125);'. The error message in the terminal window states: 'Import trace for requested module: ./app/Component/ButtonComponent.jsx ./app/page.js Compiled in 298ms (604 modules) Compiled in 529ms (617 modules)'. The terminal also shows the file path 'my-app > app > Card.css' and the file name 'loknath'.
